My 6th RMarkdown Attempt

 $Jason~Costa\\5/28/2019$

```
print("Hello World")
## [1] "Hello World"
```

R Markdown

This is an R Markdown document. Markdown is a simple formatting syntax for authoring HTML, PDF, and MS Word documents. For more details on using R Markdown see http://rmarkdown.rstudio.com.

When you click the **Knit** button a document will be generated that includes both content as well as the output of any embedded R code chunks within the document. You can embed an R code chunk like this:

summary(cars)

```
##
                         dist
        speed
                              2.00
##
    Min.
           : 4.0
                    Min.
                           :
##
    1st Qu.:12.0
                    1st Qu.: 26.00
    Median:15.0
                    Median: 36.00
                           : 42.98
##
    Mean
           :15.4
                    Mean
##
    3rd Qu.:19.0
                    3rd Qu.: 56.00
           :25.0
    Max.
                    Max.
                           :120.00
```

Including Plots

You can also embed plots, for example:

Note that the \mbox{echo} = FALSE parameter was added to the code chunk to prevent printing of the R code that generated the plot.

- \bullet bullet
- bold
- \bullet italics
